EA Valorant stats Dead by Daylight mobile app Dead by Daylight app Sudomi updatedQ: How to retrieve the username from a login record in an Access database? How can I retrieve the username from the login record into the login box of a windows form? I have created a login record. Dim login As New OleDb.OleDbCommand Dim userName As String Dim databasePath As String = "C:\MyDatabase.accdb" Dim connection As New OleDb.OleDbConnection(String.Format("Provider=Microsoft.ACE.OLEDB.12.0;Data Source={0};", databasePath)) login.Connection = connection login.CommandText = "INSERT INTO [MyDatabase.dbo].[User] (UserName, Password) VALUES ('{0}', '{1}')" connection.Open() login.ExecuteNonQuery() connection.Close() A: You need to set the CommandText property of your command to include the name of the column you want to insert the username into, the excitation beam, and the cell in the monochromatic excitation beam. The shape of the excitation beam was elliptic, with the ellipticity of the major axis being 1.1. (a) Excitation fluence of $45 \mu\text{J}/\text{cm}^2$ and electron density of $2.35 \times 10^{15} \text{ m}^{-2}$. (b) Excitation fluence of $50 \mu\text{J}/\text{cm}^2$ and electron density of $1.85 \times 10^{15} \text{ m}^{-2}$. (c) Excitation fluence of $60 \mu\text{J}/\text{cm}^2$ and electron density of 82157476 m^{-2} .
